

As a law student and subscriber of xm, I find petition 04-160 to be outrageous and oppressive. I was tired of being bombarded with disgusting commercials and sickening dj's all day long, so I made the switch to xm - and as far as I'm concerned, regular radio is forever dead. In any event, I will not stand to have my valuable reports on local weather and traffic conditions snatched away by money hungry competitors, who really are not competing - at least not fairly. Perhaps they should concentrate on improving their own programming instead of trying to stunt the success of a far superior competitor. Thank you.
